SENSE 2015

Survey of Entering Student Engagement

Phillips Community College
of the University of Arkansas

Data Comparisons

Published Spring 2016
Clear Academic Plan and Pathway
When a student, with knowledgeable assistance, creates a road map—one that shows where he or she is headed, what academic path to follow, and how long it will take to reach the end goal—that student has a critical tool for staying on track. Students are more likely to persist if they not only are advised about what courses to take, but also are helped to set academic goals and to create a plan for achieving them.

Effective Track to College Readiness
Nationally, more than six in 10 entering community college students are underprepared for college-level work. Thus, significant improvements in student success will hinge upon effective assessment, placement of students into appropriate courses, and implementation of effective strategies to ensure that students build academic skills and receive needed support.

Engaged Learning
Instructional approaches that foster engaged learning are critical for student success. Because most community college students attend college part-time, and most also must find ways to balance their studies with work and family responsibilities, the most effective learning experiences will be those the college intentionally designs.

Academic and Social Support Network
Students benefit from having a personal network that enables them to obtain information about college services, along with the academic and social support critical to student success. Because entering students often don’t know what they don’t know, colleges must purposefully create those networks. For further information about SENSE benchmarks see www.cccse.org.

Benchmark scores are standardized to have a mean of 50 and standard deviation of 25 across all entering student respondents.

PCCUA Benchmarks
The following charts reflect Phillips Community College of the University of Arkansas SENSE 2015 benchmarks and results. Early Connections (69.9%) and Clear Academic Plan and Pathway (65.1%) reflect the two highest areas. High Expectations and Aspirations is the lowest benchmark at 54.8%. Chart 2 reflects PCCUA scores as compared to the 2015 SENSE Cohort and to Top-Performing Colleges in the cohort by benchmark. Top-Performing Colleges are those that scored in the top 10 percent of the cohort by benchmark. These results provide institutions with a way to look at entering student engagement and improve institutional practices that help students succeed in college and leads to completing a degree.

Source: SENSE 2015 –PCCUA Key Findings

Source: SENSE 2015 Data
Aspects of Highest Student Engagement

Aggregated frequencies for the items which the college performed most favorably relative to the 2015 SENSE Cohort include: Clear Academic Plan and Pathway, Early Connections, and Engaged Learning. For instance, 56.6% of PCCUA students, compared with 31.9% of other students in the cohort, responded they strongly agree or agree on Item 18h reflected in the first bullet listed below.

- 56.6% of student participants responded that *a college staff member talked with me about my commitments outside of school to help me figure out how many courses to take* (Clear Academic Plan and Pathway-18h)
- 62.8% of participants responded that *a college staff member helped me determine whether I qualified for financial assistance* (Early Connections-18j)
- 75% of participants responded that *at least one college staff member (other than an instructor) learned my name* (Early Connections-18p)
- 55.5% of students responded that they *used writing, math, or other skill labs* (Engaged Learning-20f2)
- 66.3% of students responded that they used computer lab (Engaged Learning-20h2)

![Highest Aspects for Student Engagement](image)

Note: Responses *strongly agree and agree* are combined. Responses *once, two or three times, and four or more times* are combined.

*Source: SENSE 2015 PCCUA Key Findings*
Aspects of Lowest Student Engagement

Aggregated frequencies for the items which the college performed least favorably relative to the 2015 SENSE Cohort included the Engaged Learning benchmark. For instance, 84.8% of PCCUA students, compared with 88.2% of other students in the cohort responded at least once on Item 18o.

- 84.8% of students surveyed responded that they knew how to get in touch with my instructors outside of class (Academic and Social Support Network-18o)
- 67.6% of students responded that they prepared at least two drafts of a paper or assignment before turning it in (Engaged Learning-19b)
- 76.1% of students responded that they worked with other students on projects or assignments during class (Engaged Learning-19g)
- 65.8% of students responded that they used an electronic tool to communicate with an instructor about coursework (Engaged Learning-19l)
- 75.6% of students responded that they received prompt written or oral feedback from instructors on your performance (Engaged Learning-19o)

Note: Responses strongly agree and agree are combined. Responses once, two or three times, and four or more times are combined.

**SENSE Benchmarks and PCCUA Initiative Alignment**

SENSE data is used as a resource related to student behaviors, experiences and institutional practices in early weeks of college. SENSE also provides student input used in several college initiatives. Many work teams and groups use this data in initiatives such as: Achieving the Dream, Guided Pathways, Academy of College Excellence, Working Family Success Network, Faculty Inquiry Group and well as other projects, reports and groups.

College work teams reviewed SENSE data, other student engagement surveys and institutional data to identify high impact practices and developed an action plan which is incorporated into student success. The high impact practice work plan, outcomes and connection to SENSE benchmarks are listed below.

Early Connections

The following five items comprise this benchmark: *Thinking about your experiences from the time of your decision to attend this college through the end of the first three weeks of your first semester respond to each item three weeks of your first semester, (respond to each item using a five point scale from strongly agree to strongly disagree).*

- The very first time I came to this college I felt welcome (18a)
- The college provided me with adequate information about financial assistance (scholarships, grants, loans, etc.) (18i)
- A college staff member helped me determine whether I qualified for financial assistance (18j)
- At least one college staff member (other than an instructor) learned my name (18p)

*Thinking about your experiences from the time of your decision to attend this college through the end of the first three weeks of your semester, (respond answering yes or no).*

- A specific person was assigned to me so I could see him/her each time I needed information or assistance (23)

**SENSE 2015 Key Findings**

- Eighty-one percent (81%) of students responded that they felt welcome (18a)
- Seventy-six percent (76%) of students responded that the college provided them with adequate information about financial assistance (18i)
- Sixty-Six percent (66%) of students responded that a college staff member helped me determine whether I qualified for financial assistance (18j)
- Seventy-six percent (76%) of students responded at least one college staff member (other than an instructor) learned my name (18p)

*Source: SENSE 2015 Data*
High Expectations and Aspirations

When students perceive clear, high expectations from college staff and faculty, they are more likely to understand what it takes to be successful and adopt behaviors that lead to achievement. The following seven items comprise this benchmark:

*Thinking about your experiences from the time of your decision to attend this college through the end of the first three weeks of your first semester, respond to each item (using a five-point scale from strongly agree to strongly disagree).*

- The instructors at this college want me to succeed (18b)
- I have the motivation to do what it takes to succeed in college (18t)
- I am prepared academically to succeed in college (18u)

*During the first three weeks of your first semester at this college, how often did you:*

- Turn in an assignment late (19c)
- Not turn in an assignment (19d)
- Come to class without completing readings or assignments (19f)
- Skip class (19s)

**SENSE 2015 Key Findings**

- Eighty-seven percent (87%) of PCCUA students *agree or strongly agree* that they have the motivation to do what it takes to succeed in college.
- Eighty-eight percent (88%) of PCCUA students surveyed believe that they are prepared academically to succeed in college.
- More than three quarters (86%) of PCCUA students feel that instructors at this school want them to succeed.
- Nineteen percent (19%) report that they did not turn in an assignment at least once, while more than one-quarter of respondents (31%) say they turned in an assignment late at least once.
- Twenty-four percent (24%) report coming to class without completing readings or assignments at least once.
- Seventeen percent (17%) report skipping class one or more times. 

*Source: SENSE 2015 Data*
Responded strongly agree or agree  
Clear Academic Plan and Pathway

Students are more likely to persist if they are advised on which courses to take in addition to assistance with creating a plan, and setting goals to achieve the plan.

The following five items comprise this benchmark:

Thinking about your experiences from the time of your decision to attend this college through the end of the first three weeks of your first semester, respond to each item (using a five-point scale from strongly agree to strongly disagree)

- I was able to meet with an academic advisor at times convenient for me (18d)
- An advisor helped me to identify the courses I needed to take during my first semester (18g)
- An advisor helped me to select a course of study, program, or major (18e)
- An advisor helped me to set academic goals and to create a plan for achieving them (18f)
- A college staff member talked with me about my commitments outside of school (work, children, dependents, etc.) to help me figure out how many courses to take (18h)

SENSE 2015 Key Findings

Fifty-three percent (53%) of the entering PCCUA student respondents indicated that they had a specific person assigned to them and had assistance with selecting courses and creating a schedule. Sixty-two percent (62%) say they had help with setting academic goals and developing plans.

- 75% of respondents reported that their main source of academic advising was family, friends, other students and instructors.
- 83% of entering PCCUA student respondents agree or strongly agree that they were able to meet with an academic advisor at times convenient for them.
- 87% agree or strongly agree that an advisor help them to identify the courses need to take during their first semester.
- 62% agree or strongly agree that an advisor helped them set academic goals and create a plan for achieving them.
- 54% agree or strongly agree that a college staff member talked with them about their commitments outside of school to help them figure out how many courses to take.

Clear Academic Plan and Pathway

Responded strongly agree or agree
Effective Track to College Readiness

Thinking about your experiences from the time of our decision to attend this college through the end of the first three weeks of your first semester, respond answering yes or no:

- Before I could register for classes I was required to take a placement test (COMPASS, ASSET, SAT, ACT, etc.) (12a)
- I took a placement test (COMPASS, ASSET, SAT, ACT, etc.) (12b)
- This college required me to enroll in classes indicated by my placement test scores during my first semester (14)

Thinking about your experiences from the time of your decision to attend this college through the end of the first three weeks in your first semester, respond to each item:

- Within a class or through another experience at this college, I learned to improve my study skills (listening, note-taking, highlighting readings, working with others, etc.) (21a)
- Within a class or through another experiences at this college, I learned to understand my academic strengths and weaknesses (21b)
- Within a class or through another experiences at this college, I learned skills and strategies to improve my test-taking ability (21c)

SENSE 2015 Key Findings

In the SENSE survey, Ninety-four percent (94%) of PCCUA students reported taking placement tests. Seventy-four percent (74%) of entering students responded that they placed into a developmental course. Additionally, there is growing evidence that participating in student success courses leads to improved student outcomes, especially for developmental students.

- 49% of entering students enrolled in developmental reading (17a)
- 58% enrolled in developmental writing (17b)
- 60% enrolled in developmental math (17c)
- 60% enrolled in a student success course (17e)
- 77% learned to improve study skills (21a)
- 71% learned to understand academic strengths and weaknesses (21b)
- 65% learn skills and strategies to improve test-taking ability (21c)

**Student Goals for Attending College**

Students identified goals for attending PCCUA and survey results indicated that 76% planned to complete a certificate, 85% planned to obtain an associate’s degree and 75% planned to transfer to a four-year institution.

Responded yes or no  
Source: SENSE 2015 Data
Engaged Learning

Instructional approaches that foster engaged learning are critical for student success. Students must find ways to balance their studies with work and family responsibilities, the most effective learning experiences will be those the college intentionally designs. The following 16 items comprise this benchmark:

- Asked questions in class (19a)
- Prepare two drafts or assignment (19b)
- Participate in supplemental instruction (19e)
- Work with other students during class (19g)
- Work with other students outside class (19h)
- Discuss ideas from readings with instructor (19q)
- Use face to face tutoring (20.2d)
- Used writing, math, other skill labs (20.2f)
- Used computer lab (20.2h)
- Participate in student initiated study groups not required (19j)
- Used electronic tool to communicate with another student (19k)
- Discuss assign or grade with instructor(19m)
- Ask for help from instructor (19n)
- Receive prompt written or oral feedback from instructor (19o)
- Participate in required study groups outside class (19i)
- Use electronic tool to communicate with instructor (19l)

Responded one or more times

Source: SENSE 2015 Data
**SENSE 2015 Key Findings**

In addition to reviewing student responses related to what they strongly agree or agree with, it is interesting to compare responses of what students state they **NEVER** do related to engaged learning.

In the first three weeks of college, PCCUA entering students responded:

- 40% say they **are not** enrolled in a student success course.
- 5% report that they **never** asked questions in class or contributed to class discussions.
- 32% say they **never** prepared at least two drafts of a paper or assignment before turning it in.
- 52% report that they **never** participated in supplemental instruction.
- 15% say they **never** worked with other students on a project or assignment during class.
- 50% say they **never** worked with classmates outside of class on class projects or assignments.
- 65% say they **never** participated in a required study group outside of class.
- 71% report that they **never** participated in a student-initiated (not required) study group outside of class.
  - 28% say they **never** used an electronic tool to communicate with an instructor about coursework.
- 27% say they **never** discussed an assignment or grade with an instructor.
- 18% say they **never** asked for help from an instructor regarding questions or problems related to a class.
- 23% say they **never** received prompt written or oral feedback from instructors on their performance.
- 53% report that they **never** discussed ideas from readings or classes with instructors outside of class.
- 81% report that they **never** used face to face tutoring.
- 33% say they **never** used writing, math, or other skill labs.
- 30% say they **never** used a computer lab.
- 28% say they **never** used an electronic tool to communicate with another student about coursework

Academic and Social Support Network

Students benefit from having a personal network that enables them to obtain information about college services, along with the academic and social support critical to student success. Because entering students often don’t know what they don’t know, colleges must purposefully create those networks.

The following items comprise this benchmark:

- All instructors clearly explain academic & support services (18l)
- All instructors clearly explain course grading policy (18m)
- All instructors clearly explain course syllabus (18n)
- Knew how to get in touch with instructors (18o)
- At least one other student whom didn’t know previously learned my name (18q)
- At least one instructor learned my name (18r)
- Learned the name of at least one other student in most of my classes (18s)

SENSE 2015 Key Findings

PCCUA students responded positively to the questions that asked about building support networks.

- 76% of respondents agree or strongly agree that all instructors clearly explained academic and student support services available at their college.
- 86% agree or strongly agree that all instructors clearly explained course grading policies.
- 94% agree or strongly agree that all instructors clearly explained course syllabi.
- 88% agree or strongly agree that they knew how to get in touch with their instructors outside of class.
- 76% agree or strongly agree that at least one other student whom they didn’t previously known learned their name.
- 93% agree or strongly agree that at least one instructor learned their name.
- 91% agree or strongly agree that they learned the name of at least one other student in most of their classes.

Student Orientation

Student orientation is a college priority and the College implemented mandatory student orientation in the fall of 2012 and it is held each fall at all three campuses. Student orientation increases student awareness of college purpose, processes, and procedures and also improves student readiness for classes, motivation to become engaged and encouragement to seek assistance and prepares them for the academic year. The dates for student orientation are reflected in the College’s Academic Calendar, the fall semester Schedule of Classes and the College Catalog. All new and returning students are required to attend student orientation.

Academic Advising and Planning Module- SENSE 2015

Intrusive advising was identified as another priority based on early data from the SENSE survey. The data indicated that some students did not realize that they had an advisor assigned to them. Teams reviewed the data developed an action plan to reinforce academic advising at the College. The action plan included: 1) providing students with direction to assist with identification of academic/vocational goals; 2) creating an academic plan; 3) assisting student with identification of course needed to meet goals; 4) providing intrusive, close advisor contact ensuring that student can identify and are using advising services; and 5) requiring students to meet with advisor at least three times during the semester. The College continues to fine tune the advising process to meet the needs of students and help them successfully develop an academic plan for completion and success.

Additionally, the SENSE 2015 Survey also included an Academic Advising and Planning Module that specifically targeted questions related to advising and planning. This module is helpful in providing student perceptions about the intrusive advising strategy. This data has also been disaggregated by gender and ethnicity.

The following twelve questions were included in the advising and planning module for entering students:

*A college staff member...*

- 71% Spends time helping me understand the process of enrolling in and attending college
- 75% clearly explained how placement test scores were used to determine if I was ready for college-level courses or needed to take courses to become college ready
- 58% helped me design a course sequence that showed how long it would take to attain educational goals
- 70% clearly explained core courses and other requirements for completion
- 73% talked with me about completing a degree/certificate
- 65% clearly explained where to find help for dropping/withdrawing from college
- 80% clearly explained consequences of receiving poor grades
- 36% currently participating in academic advising and planning as part of courses
- 62% helped me understand how many hours outside of class to study and prepare for classes
- 53% helped me understand major or career related to high demand occupation
- 38% helped me understand how much money I may earn in job related to career/major
- 40% helped me understand where likely to find employment in career/major

Overview of PCCUA Participants and General Data - SENSE 2015

The Survey of Entering Student Engagement (SENSE) was administered during the fall 2015 semester to 272 entering students. The survey was conducted in randomly selected class populations of all first college-level English and math courses and all developmental education courses.

SENSE and CCSSE Surveys funded through Achieving the Dream

Achieving the Dream is a national initiative to help more community college students succeed. The initiative is particularly concerned about student groups that traditionally have faced significant barriers to success, including students of color and low-income students.
